Trustwave Named 2011 SC Magazine Excellence Award Finalist

Leading Security Firm Nominated for Best Security Company

CHICAGO (November 10, 2010) - Trustwave, a leading provider of information security and compliance solutions, has been named a 2011 SC Magazine Awards finalist for leadership and achievement in information security. Trustwave is recognized in the Excellence Award Best Security Company category, which acknowledges companies with superior security products that help businesses throughout the world understand, manage and mitigate the latest security threats.

"We're proud to acknowledge the excellence of Trustwave," said SC Magazine Editor-in-Chief Ilena Armstrong. "The threats to the private and public sector do not rest and continue to evolve; Trustwave is one of a select cadre leading the way to fend off today's malicious attacks."

Trustwave Upgrades WebDefend® Web Application Firewall for Greater Functionality

New Version 5.0 Features Enhanced Virtual Patching, Multi-Tenancy and Protection for Multi-Language Web Sites

CHICAGO (November 18, 2010) - Trustwave, a leading provider of information security and compliance solutions, has unveiled a major upgrade to its WebDefend Web Application Firewall.

A Web application firewall (WAF) is a technology that provides protection for Web applications (such as an e-commerce site) against cyber attacks. Trustwave WebDefend provides Web applications with real-time, continuous security against attacks and data loss, ensures Web sites operate as intended and help businesses comply with industry regulations such as the Payment Card Industry Data Security Standard. WebDefend is in use today at businesses around the globe, protecting Web applications from attacks that could disrupt business and compromise sensitive data.

CA ARCserve® Backup r15

CA ARCserve Backup goes beyond backup, giving small and medium-sized businesses the highly reliable data protection that normally only big business can afford – at a fraction of the cost. Powerful, yet easy-to-use central management tools allow you to protect both physical and virtual servers with high-performance backup, data deduplication, infrastructure visualization and SRM and granular restore of Active Directory objects and applications like Exchange and SharePoint.

Enhanced SRM reporting tells you about potential problems before they happen – so you can proactively avoid unplanned downtime.

It works no matter how complex your infrastructure is.

XLNsystems and Citrix Online partner to provide remote connectivity tools and services.

Citrix Online is a fast-growing division of Citrix Systems, Inc. (Nasdaq: CTXS), based in Santa Barbara, California, with satellite offices and data centers around the world.

Every month, more than 17,000 new customers start using Citrix Online's services to work from anywhere with anyone – using our remote-connectivity tools to save time, get more done and connect to others around the world.

- A small business owner is able to work from home thanks to GoToMyPC.
- A project manager collaborates with remote co-workers using GoToMeeting.
- A trainer cancels her flights and conducts live online training with GoToTraining.
- A marketer generates a list of eager buyers by inviting prospects to an online Webinar.
- A support agent fixes a customer's PC remotely on the first call using GoToAssist.

At Citrix Online and XLNsystems, we believe in creating products that we ourselves want to use. Call us to find out more!
